WeatherSure Systems, Inc. reaches new height at LDS Temple

SYSTEM

- Dow Corning 795 Silicone wall joint sealant
- Dow Corning 791 Silicone horizontal reglet sealants
- Total cut out and re-caulk

When the Church of Latter Day Saints needed to complete the replacement of all exterior sealants at the Denver area Temple, they reached out to WeatherSure to complete the project. To meet the critical 11 day construction period during the summer shut-down, WeatherSure Systems, Inc. employees literally worked around the clock with up to 9 skilled technicians on-site. Utilizing Dow Corning Sealants, WeatherSure Systems, Inc. is confident that their efforts have provided a twenty year solution for the Temple's weather-proofing needs.

Installation quality combined with jobsite cleanliness was a must for this project. WeatherSure Systems, Inc. technicians provided meticulous attention to every detail to insure a product the Temple and our Company would be proud of.

Hands and knees effort were required.
